Project

Name: Net-Banking
Duration: 3 months

Description:
The main objective of this project is to create an internet banking website by which the bank customers can make transactions like Balance Inquiry, Fund transfer, Statement view, Bill pays etc. from the convenience of their homes. Normally the customer would have to make a trip to the bank to do these transactions, but with the advent of internet banking the ease of account operation for customers has gone up. All the customer requires is a PC with an internet connection and internet banking login id and password to use this facility.

Role:
- Worked as a Team Leader
- Performed coding using JSP, HTML
- I am responsible for some coding and database work.

Technology:
Java, MySQL Database

Operating System:
Microsoft windows 10
